

StormPro™ Multi-Point Pairs

Product Bulletin 03

03/06/09

StormPro Multi-Point Pairs

Ceco Door expands StormPro line of tornado resistant products to include paired openings, giving end-users another option for creating a highly functional, safe room opening up through 8'-0" x 8'-0".

These StormPro pairs use multi-point locks on the active side and surface bolts on the inactive door side to shield occupants in a safe room from flying debris. The new StormPro multi-point pairs are third party certified with Underwriters Laboratories with listings to meet FEMA 361 and FEMA 320 standards, and are fire rated through 3 hours. As with all StormPro products, the certified labels are applied to each door.

Available Sizes

- Up through 8'-0" x 8'-0" maximum

Frame Type

- StormPro 14 gauge frame, 5 3/4" depth thru 14"
