

Ceco Door is proud to announce the integration within ASSA ABLOY crcDash. The crcDash site is an informational portal for the following items:

- Monthly and yearly sales
- Account statements
- Order status
- Quotes
- Invoices

With crcDash, you can access information for all the ASSA ABLOY brands available to them. You will no longer need to go to each brand's website.

The crcDash for Ceco Door will be available beginning May 21, 2012. You can access crcDash through the ASSA ABLOY Door Security Solutions website www.assaabloydss.com or through the Ceco Door website www.cecodoor.com. Both these locations are in the secure section of the website and require a user name and password.

For new users to sign up, go to <https://extranet.assaabloydss.com> and click on the "Sign Up for Extranet Account" button. Fill out the form, including any account numbers. Once submitted, the form will be verified and a user account will be set up within a business day or so. Once your account is set up, you will receive an email with a User ID and Password. The password can be changed when logging in.

The current Order Status part of the Ceco Door Distributor Website will only be maintained until June 30, 2012. After that date, the Order Status tool will no longer be available.

If you have any questions, please contact Ceco Door Customer Service or your local ASSA ABLOY Door Security Solutions Representative.
