

Is your opening

Attack Resistant?

Now
Fire Rated
up to
90 Minutes!

Attack Resistant Openings from Ceco Door increase the safety of building occupants by delaying entry to an attacker until first responders can arrive.

Every second matters!

In an emergency situation involving an armed attacker, the attack Resistant Opening provides at least 4 minutes of resistance to ballistic and physical attack.

Testing:

Standards for Reinforcing and Testing of Standard Wood and Hollow Metal Doors, Frames, Glass and Hardware – 30 shots (7.62 mm) fired at glass and 30 shots fired at door hardware, 30 shots fired at a sidelight glass in a 6" x 6" area. Door then remained closed after over 4 minutes of attack by single assailant using hand tools of various types as allowed in test.

Single assailant
Firing a Level 8 - 7.62 mm rifle

Note:

Although the glazing, door, or hardware will not stop a bullet from penetrating, the Attack Resistant opening will not weaken and become vulnerable during the attack.
