

Attack vs Forced Entry

Know the Difference...

Attack Resistant Opening:

- Extra protection at cost-effective price
- Almost 60% less cost than a Level 8 bullet resistant door and frame
- Resists 4-minute attempt by intruder to enter, giving occupants time to escape or take cover and remain secure
- Not bullet resistant, but can withstand up to 60 rounds of 7.62 ammunition without coming unlatched
- Uses hollow metal (16 ga.) or wood doors, hollow metal frame (16 ga.), School Guard Glass™ SG5™ and SARGENT 8200 series mortise lock with latchbolt, deadbolt and LS escutcheon hardware, and standard weight McKinney hinges
- Ideal for applications such as schools, places of worship, offices, other public gathering rooms

Forced Entry Bullet Resistant (FEBR) Openings:

- Tested to the highest level of U.S. Department of State protection against 15-minute mob-level ballistic threats
- 12 gauge hollow metal door and frame bullet-resistant to UL752 Level 8
- Factory installed forced entry 3-point exit device with deadbolt system
- Pemko HG3505 stainless steel continuous hinge with security studs and fire pins factory installed
- Factory supplied forced entry threshold
- Ideal for government/military, control and safe rooms, and guard houses
